DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I (claims 1-9 and 27) in the reply filed on 09/15/2006 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-9 and 27 are rejected under 35 U.S.C. 102(e) as being anticipated by Hutchison, IV et al. (6,725,061).

Regarding claims 4 and 6, Hutchison discloses an interface system, comprising: a radio having a microcontroller 112, 114 with bi-directional GPIO(s) connected to an external radio interface 136, wherein the GPIO(s) interface being configured as an input device upon radio power-up (upon radio power-up and connection to external accessory) and wherein the radio periodically checking the external radio interface to detect the presence of an accessory; a plurality of accessories having physical configuration descriptors and event mapping descriptors (identifiers) stored therein and

each having an external radio interface; and the external radio interface automatically being configured to each external accessory based on the physical configuration and mapping descriptors of each of the plurality of accessories (See figs. 1, 3-4 and col. 5 line 1 to col. 6 line 51).

Claims 1, 2 and 27 are rejected for the same reasons as set forth in claims 4 and 6.

Regarding claims 3 and 7, Hutchison discloses as cited in claims 2 and 6. Hutchison further discloses the physical configuration descriptors includes data direction, logic sense and priority and provides logic highs and lows to the GPIO(s) (See fig. 3).

Regarding claim 5, Hutchison discloses as cited in claim 4. Hutchison further discloses the GPIO(s) comprises an extended GPIO to limit the interface system to predetermined accessories (See col. 5 lines 24-28).

Regarding claim 8, Hutchison discloses as cited in claim 6. Hutchison further discloses the radio modifies performance of an accessory from the plurality of accessories based on the physical descriptor of that accessory, by selectively controlling the logic of the GPIO(s) (See col. 5 lines 19-22).

Regarding claim 9, Hutchison discloses as cited in claim 6. Hutchison further discloses the radio rejects an accessory from the plurality of accessories based on the physical descriptor of the accessory (See fig. 4).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Puthuff (6,112,103); Panian (6,285,890); Warner et al. (5,257,413).
